

Welcome and introduction

*Workshop on use of QSAR Toolbox –
Feedback from Industry Users and Development Needs
24 November 2011*

*Mike Rasenberg, HoU
ECHA – Computational Assessment Unit C3
Directorate C*

Objectives of the meeting

- Sharing experience and best practice
- Identify needs for implementation of additional features in the QSAR Toolbox
- Identify needs for other types of support in view of the next registration deadline 2013

Outcome of the workshop

- Presentations and discussions will be used to identify key issues
- Summary presented at the end of the workshop
- Discussion and agreement on findings planned for last session 4 “ways forward”
- List of participants distributed?
- List of participants published?
- Speakers: please let us know if presentation could be made available

Next steps

- ECHA and OECD secretariat with involvement of QSAR Toolbox developers to evaluate feedback and plan the future development and support of the tool
- Making available findings at ECHA website
