ECHA/RAC Response				
Your detailed comments have been considered and several corrections or editorial changes have been implemented and details have been specified in the in the Opinion and/or Annex 1.				
Section 9.1.2 (Cancer risk assessment) has been extensively reviewed, as now total alimentary tract findings, including forestomach neoplasms, are taken into account. Consequently, the cancer exposure risk relationship calculations have been revised and explanatory details added.				
Section 9.2.2 on hypothetical OEL calculations has been corrected and further details and explanations have been added.
