

# Welcome

## Webinar: Getting to know the IUCLID Cloud

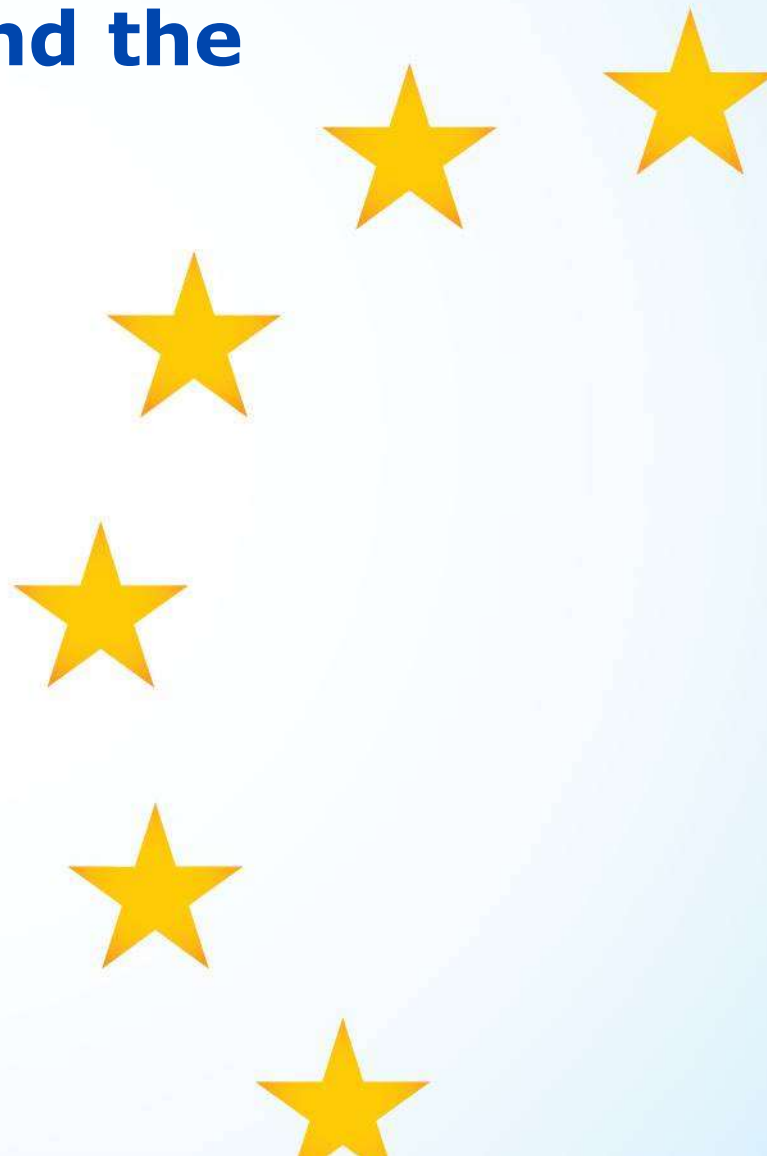

20 September 2017

Tommy Hägg

ECHA Cloud Services

# **ECHA Cloud Services and the IUCLID Cloud for SMEs**

## What is

## ECHA Cloud Services

- A new platform for delivery of Business Information systems
- Triggers
  - The need to maintain an operational IUCLID version has been raised as a burden for Small and Medium size Enterprises (SMEs)
  - The usage of IUCLID for non-frequent users is seen as complex
- Solution
  - Provide IUCLID 6 as a Cloud service

## What are the goals with

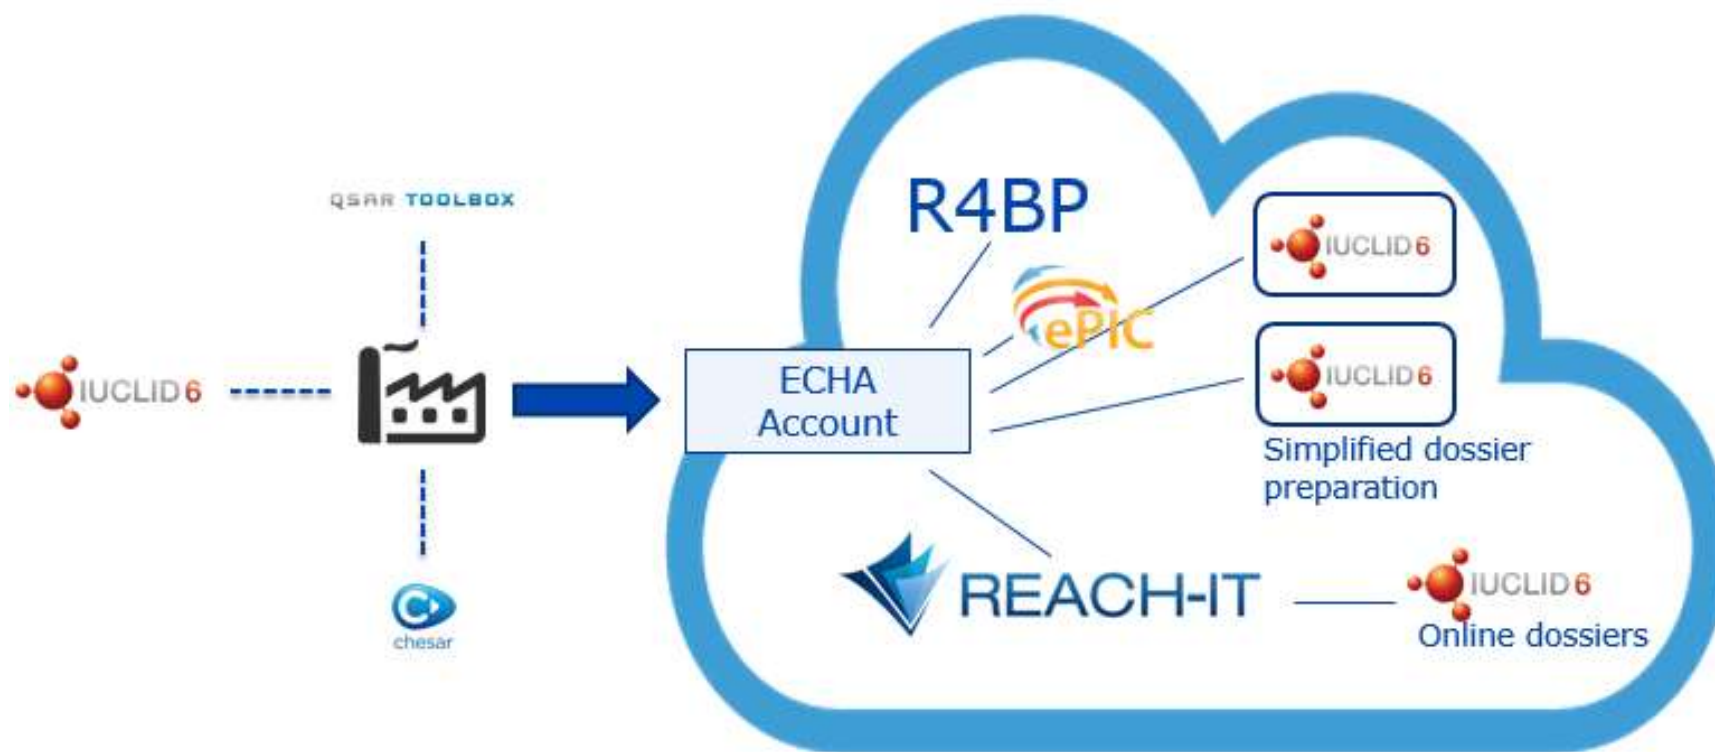

**ECHA Cloud Services**

- To provide IUCLID through the cloud with the aim to:
  - Significantly reduce the technical burden and related costs (financial, labour) related to hosting, updating and operating IUCLID locally for industry
  - Support collaboration between Industry and their consultants for the REACH 2018 deadline
  - Support the dossier preparation process (late 2017)

# ECHA Cloud Services

## IUCLID Cloud for SMEs

- Aimed for SME users to prepare registration dossiers under REACH for 2018 deadline
- Work fully on a web browser without installing anything locally
- Automated backup and data recovery in case of data loss
- Helpdesk support during office hours
- Immediate subscription activation
- Up to 1 GB of secure data storage
- Target 24/7 availability except for pre-defined maintenance periods occurring outside the working hours
- Controlled service updates with every new release of IUCLID
- Integrated help and support for dossier preparation (End 2017)

## IUCLID Cloud Trial

- Aimed for anyone who would like to test, train, organise trainings or have a view of what the cloud version of IUCLID looks like
- Work fully on a web browser without installing anything locally
- No backup of data
- Immediate subscription activation
- Up to 100 MB of secure data storage
- Target 24/7 availability except for pre-defined maintenance periods occurring outside the working hours
- Controlled service updates with every new release of IUCLID
- Integrated help and support for dossier preparation (End 2017)

## What to remember about ECHA Cloud Services ?

- A new platform for delivery of Business Information systems, initially used for distributing IUCLID Cloud and to support collaboration between industry and consultants
- Initial aim is to support SMEs users and their consultants in their preparation for the REACH 2018 deadline
- Security is at the heart of the ECHA Cloud Services. Global measures such as encrypted communications between the client computer and the Cloud are enforced
- Over 350 companies have already subscribed to the services and the number is growing every day – why don't you do that as well as a step for getting closer to REACH 2018
