Harmonised classification and labelling

Dossiers planned for RAC 56-58

- This is an indicative planning for RAC 56 – 58 which is regularly updated / revised based on the exact submission dates for CLH intentions
- By default a 4-week RAC consultation is foreseen for the 1st draft ODD (*However, this period may be shortened where justifiable; e.g. for small-scale dossiers with non-controversial hazard classes*)
- Additional deadlines for different steps (including the steps after the adoption of an opinion) are introduced in order to allow for better planning of the process
- In some cases (for complex and/or complicated (groups of) dossiers) two or more plenary meetings may be needed
- Dossiers / hazard classes which would be proposed for fast track agreement will be identified at later stage - based on the outcome of the PC and the RAC consultation
