

SCIENTIFIC OFFICER – SUBSTANCE AND DOSSIER EVALUATION; ref.: ECHA/SNE/2019/005

JOB DESCRIPTION:

The Seconded National Expert (SNE) will work in one of the Units in Directorate Hazard Assessment in charge of dossier and substance evaluation. The SNE will take part in one or several of the activities listed below:

- Contributing to the (eco)toxicological assessment of groups of structurally similar substances under the integrated regulatory strategy, to decide on the need for regulatory risk management or the generation of further information;
- Carrying out scientific/technical tasks to support the substance evaluation process, including the coordination and support of the evaluations performed by Member States;
- Carrying out scientific/technical tasks related to the process of dossier evaluation, in particular the assessment of testing proposals and the compliance checks of REACH registration dossiers;
- Contributing to the implementation of the new approach to perform an integrated substance evaluation and compliance check (combo approach) by a close collaboration between ECHA and the evaluating Member State;
- Contributing to the assessment of reproductive toxicity information requirements and in particular the design of the extended one reproductive toxicity study;
- Contributing to scientific/technical activities of related REACH and CLP processes, in particular regulatory risk management;
- Carrying out scientific/technical tasks related to the further optimisation of standard operation procedures and IT tools applied during the substance or dossier evaluation processes.

REQUIREMENTS:

Education: Successful completion of a full course of university studies attested by a scientific degree in chemistry, engineering or (eco) toxicology where the normal duration of university education is three (3) or more years.

Experience:

- At least three (3) years of professional experience in chemicals risk assessment and/or management
