

Community rolling action plan (CoRAP) update covering years 2013, 2014 and 2015

The CoRAP update for years 2013-1015 lists 115 substances for evaluation by the Member States Competent Authorities under the substance evaluation process of the REACH Regulation (EC) No 1907/2006 (Articles 44 to 48). The plan contains 62 newly allocated substances and 53 substances as already published in the previous CoRAP on 29 February 2012. The substances are distributed for evaluation in years 2013, 2014, and 2015 between 22 Member States. 46 substances are being evaluated in 2013 by 21 Member States. In 2014 and 2015 the aim is to evaluate at least 46 and 23 substances, respectively. However, by the end of March 2014 this plan is going to be updated again and changes may be introduced for the substances in years 2014 and 2015 (Article 44(2) of the REACH Regulation). Also new substances may be added for those years.

The CoRAP update has been prepared in close cooperation with the Member States, taking into account the criteria for selection of substances¹. A draft CoRAP was submitted on 12 October 2012 to the Member States and the ECHA Member State Committee (MSC) for their opinion and the draft was also published on the ECHA website on 23 October 2012. ECHA published this CoRAP update on 20 March 2013 on the basis of the favourable opinion of the MSC that was taken on 6 February 2013.

Initial grounds for concern

The plan contains substances for which there is a suspicion that their manufacture and/or use could pose risks to human health or the environment. Substance evaluation under REACH aims clarifying such potential risks.

In the CoRAP update the grounds for the initial concern that triggered the selection of substances for evaluation are briefly described. Furthermore, the concerns per substance are explained in more detail in the related justification documents available in the dynamic CoRAP table published on ECHA website. These documents only indicate the initial grounds of concern and the reason for selecting the substances for evaluation. They do not prejudge the outcome of the evaluation itself. In many cases the initial concerns are related to PBT²-properties, suspected endocrine disruption, or carcinogenic, mutagenic and reprotoxic properties in combination with wide dispersive use or consumer uses. In general, the uses of these substances cover various areas and are not focussed on any particular industrial, professional or consumer uses. The indication of the initial concern does not limit the evaluation made by the Member States, since the Member States may also focus their assessment into other concern areas they find relevant during the evaluation.

¹ Selection criteria to prioritise substances for Substance Evaluation (2011 CoRAP selection criteria) http://echa.europa.eu/doc/reach/evaluation/background_doc_criteria_ed_32_2011.pdf

² PBT: Persistent, Bioaccumulative and Toxic

Interaction

In the CoRAP update the contact information of the Member State Competent Authority is provided for each substance to facilitate interaction of the registrants with the evaluating Member State. ECHA encourages the Member States and registrants to have dialogues in order to clarify any concerns related to the substances. This applies to all substances on the CoRAP, but in particular, this is important for the substances to be evaluated in 2013.

Evaluation process

The designated Member States have 12 months to evaluate substances specified for 2013 starting from the date of publication of this CoRAP update. Where necessary, Member States will prepare a draft decision for requesting further information to clarify the suspected risks. In the draft decision the Member State can propose to request any information relevant for the risk assessment of the substance. The first draft decisions for the substances listed in 2013 need to be submitted to ECHA by 19 March 2014. ECHA will forward any draft decisions to the registrants for comments without undue delay. Draft decisions will also be reviewed by the other Member States and ECHA. If proposals for amendment are made, the MSC is also involved in decision-making before the decision becomes effective. In cases of unanimous agreement in MSC ECHA will take the final decision; otherwise the decision will be taken by the European Commission.

Community rolling action plan (CoRAP) update covering years 2013, 2014 and 2015

This document contains the Community rolling action plan (CoRAP) update, a list of 115 substances which are scheduled to be evaluated in years 2013-2015. Furthermore it contains the names of the evaluating Member States with contact details and the indication of the initial grounds for concern.

Correspondence related to Substance evaluations should contain in the subject field the following string: "SUBSTANCE EVALUATION"
2015	United Kingdom	204-112-2	115-86-6	triphenyl phosphate	Human health/Suspected endocrine disruptor; Exposure/Wide dispersive use; Consumer use; Aggregated tonnage	already in CoRAP but for 2014	UK REACH CA Health and Safety Executive 4N.G Redgrave Court, Merton Road, Bootle, Merseyside L20 7HS; e-mail: UKREACHCA(at)hse.gsi.gov.uk
2015	United Kingdom	253-775-4	38083-17-9	climbazole	Human health/Suspected CMR; Exposure/Wide dispersive use; Consumer use	new entry	UK REACH CA Health and Safety Executive 4N.G Redgrave Court, Merton Road, Bootle, Merseyside L20 7HS; e-mail: UKREACHCA(at)hse.gsi.gov.uk

- (*) Where two Members States are indicated, this is a joint evaluation. The first Member State mentioned leads the Evaluation and is the responsible competent authority in the meaning of Article 45(2) of REACH.
- (**) The EC Number is not available. Therefore, the number assigned to substances by ECHA after the inquiry process is used.
- (***) The substance identifiers may change as a consequence of the clarification of the registered substance identity by ECHA. This may lead to changes in the name or/and identifiers of the substance.
- (****) This entry may be further revised in the CoRAP update for years 2014-2016, when considering similar substances.
- ^ The substance public name is used. In most of the cases it is the name disseminated on the ECHA website.
- This is an indication of the initial grounds for concern. It should be noted that when the substances are included in the CoRAP, they have not yet been evaluated and thus the concern is indicative and not exhaustive or conclusive.

Legend:

<u>CMR/Sensitiser</u>: known carcinogenic and/or mutagenic and/or reprotoxic properties/known sensitising properties (according to CLP harmonized or registrant self-classification or CLP Inventory)

<u>Suspected CMR/Suspected sensitiser</u>: suspected carcinogenic and/or mutagenic and/or reprotoxic properties/suspected sensitising properties (not classified according to CLP harmonized or registrant self-classification)

Suspected PBT: Potentially Persistent, Bioaccumulative and Toxic
