

## REACH Registration statistics

### All Countries \*

Data as of: 31/05/2022

\* EEA (EU27, Norway, Iceland and Liechtenstein) + UK(NI)

#### Overall Summary

#### REACH registrations by companies from 1st June 2008

The following table shows the currently valid registrations granted by ECHA following the submission of a registration dossier or due to the existence of a NONS notification.

	# Registrations	# Substances	# Companies
Registrations	102 407	22 998	16 018

#### Detailed Registration Statistics

Notifications made by companies under the previous chemicals legislation (Directive 67/548/EEC - NONS Notifications) are considered registered under REACH. They may be claimed (ECHA is aware of the current details of the company) or not. They also may be updated (ECHA has received a dossier submission under REACH) or not. In the tables below, NONS notifications which have not been updated are reported separately.

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. This is why the numbers below do not add up to the total number of registrations.

Breakdown by Registration Type	# Registrations	# Substances	# Companies
registered as full registration	77 827	12 883	15 220
registered as intermediate	19 669	9 745	2 598
<i>Transported isolated intermediates</i>	15 187	7 155	2 414
<i>On-site isolated intermediates</i>	5 571	4 064	786
NONS Notifications	6 043	3 610	-
<i>of which have been claimed</i>	2 864	2 298	498

#### Joint Submission is a fundamental principle of REACH. Its aim is to reduce costs and avoid unnecessary testing on animals

This table provides a breakdown of the number of registrations submitted in a joint submission (multiple registrants) compared to individual submissions (single registrants).

Breakdown by Joint Submission role	# Registrations	# Substances	# Companies
Registrations in Joint Submissions	91 785	16 980	15 709
<i>Lead</i>	17 754	N/A	N/A
<i>Member</i>	74 031	N/A	N/A

## REACH Registration statistics

### Denmark

Data as of: 31/05/2022

#### Overall Summary

##### REACH registrations by companies from 1st June 2008

The following table shows the currently valid registrations granted by ECHA following the submission of a registration dossier or due to the existence of a NONS notification.

	# Registrations	# Substances	# Companies
Registrations	701	539	138

#### Detailed Registration Statistics

Notifications made by companies under the previous chemicals legislation (Directive 67/548/EEC - NONS Notifications) are considered registered under REACH. They may be claimed (ECHA is aware of the current details of the company) or not. They also may be updated (ECHA has received a dossier submission under REACH) or not. In the tables below, NONS notifications which have not been updated are reported separately.

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. This is why the numbers below do not add up to the total number of registrations.

Breakdown by Registration Type	# Registrations	# Substances	# Companies
registered as full registration	470	327	133
registered as intermediate	120	119	13
<i>Transported isolated intermediates</i>	77	76	11
<i>On-site isolated intermediates</i>	59	59	6
NONS Notifications	113	101	-
<i>of which have been claimed</i>	16	15	9

Data as of: 31/05/2022

#### Overall Summary

##### REACH registrations by companies from 1st June 2008

The following table shows the currently valid registrations granted by ECHA following the submission of a registration dossier or due to the existence of a NONS notification.

	# Registrations	# Substances	# Companies
Registrations	7 843	3 335	2 502

#### Detailed Registration Statistics

Notifications made by companies under the previous chemicals legislation (Directive 67/548/EEC - NONS Notifications) are considered registered under REACH. They may be claimed (ECHA is aware of the current details of the company) or not. They also may be updated (ECHA has received a dossier submission under REACH) or not. In the tables below, NONS notifications which have not been updated are reported separately.

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. This is why the numbers below do not add up to the total number of registrations.

Breakdown by Registration Type	# Registrations	# Substances	# Companies
registered as full registration	6 293	2 329	2 273
registered as intermediate	1 197	933	408
<i>Transported isolated intermediates</i>	999	758	400
<i>On-site isolated intermediates</i>	206	194	30
NONS Notifications	402	264	-
<i>of which have been claimed</i>	96	83	20

#### Joint Submission is a fundamental principle of REACH. Its aim is to reduce costs and avoid unnecessary testing on animals

This table provides a breakdown of the number of registrations submitted in a joint submission (multiple registrants) compared to individual submissions (single registrants).

Breakdown by Joint Submission role	# Registrations	# Substances	# Companies
Registrations in Joint Submissions	7 107	2 890	2 439

## REACH Registration statistics

### Poland

Data as of: 31/05/2022

#### Overall Summary

##### REACH registrations by companies from 1st June 2008

The following table shows the currently valid registrations granted by ECHA following the submission of a registration dossier or due to the existence of a NONS notification.

	# Registrations	# Substances	# Companies
Registrations	2 101	1 011	679

#### Detailed Registration Statistics

Notifications made by companies under the previous chemicals legislation (Directive 67/548/EEC - NONS Notifications) are considered registered under REACH. They may be claimed (ECHA is aware of the current details of the company) or not. They also may be updated (ECHA has received a dossier submission under REACH) or not. In the tables below, NONS notifications which have not been updated are reported separately.

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. This is why the numbers below do not add up to the total number of registrations.

Breakdown by Registration Type	# Registrations	# Substances	# Companies
registered as full registration	1 818	803	667
registered as intermediate	295	262	57
<i>Transported isolated intermediates</i>	204	188	52
<i>On-site isolated intermediates</i>	129	115	21
NONS Notifications	7	7	-
<i>of which have been claimed</i>	6	6	6

#### Joint Submission is a fundamental principle of REACH. Its aim is to reduce costs and avoid unnecessary testing on animals

This table provides a breakdown of the number of registrations submitted in a joint submission (multiple registrants) compared to individual submissions (single registrants).

Breakdown by Joint Submission role	# Registrations	# Substances	# Companies
