**ENFORCEMENT
ACTION**

Have cases pertaining to the last resort requirement been investigated and/or enforced?

Which MSs are actively enforcing the last resort requirement?

Are MSCAs regularly obtaining adequate information from ECHA?

Are MSCAs communicating effectively with Dir 2010/63 authorities?

Is the Forum aware of the COM reasoned opinion directed at Germany regarding Dir 2010/63/EU?

In addition to Article 13.1, which of the enforceable articles under Title III are a priority for the future and how will they be actively enforced?
