# Simplified SCIP Notifications (SSN) and 'parallel' supply chains

# Simplified SCIP notification (SSN)

- **Target user:** Distributors
- **In which situations can it be used?** Only applicable if the article/complex object received is the same as the one supplied.
- **How does it work?** The distributor will submit a notification by referring to data submitted by his supplier. To be done via an alphanumeric identifier that the supplier receives after notification

## Basic principles

1. The product received = product supplied

No change on  
the article

2. No dossier needed in the submission

3. The distributor links to the notification of the supplier and does not need to submit updates

# Simplified SCIP notification (SSN) overview

# What 'product received = product supplied' means

## Articles as such

**No change on the physical form nor composition on article** supplied in comparison to the article received

No change on the article

## Complex objects

**No change on the complex object** supplied in comparison to the complex object received

No change on the complex object

## + for both cases

The **identification elements (identifiers)**, i.e. names, alphanumeric identifiers, and article category, of the article as such or complex object (product) supplied **is the same** as that of the article or object received.

# Where do I find the SCIP number?

Submission status: Succeeded ✓

Dossier type: SCIP notification  
Submitted by: Stefan Supan  
Submission number: RMH209873-05  
SCIP IT User:  
Submitted IUCLID version: 6\_4  
ECHA-e68c8e

## Submission information

SCIP number **6df89c5f-e28f-4349-9a44-3884bf68bd77**  
Article name: Wheel  
EAN (European Article...): 966985755  
Dossier name:  
Dossier UUID: 5801b692-de9e-425a-819c-7ff2cceed767  
File name: 5801b692-de9e-425a-819c-7ff2cceed767.i6z  
Notification type: Initial

SCIP number is now available in the submission report

### SCIP number:

is a number assigned by ECHA to the initial SCIP notification of an article. It is shared on all related submissions of the same article.

New feature to export Submission information e.g. SCIP number

# Simplifying submission of data

- Third parties can submit data on your company's behalf, based on intra-party arrangements (**'foreign user'** concept)
- Defining how to **re-use** data submitted by a supplier
  - **Simplified SCIP notification (SSN)**: if an article is not changed, the duty holder can benefit from a simplified notification referring to the data submitted by his supplier, without preparing a dossier (e.g. useful for distributors)
  - **Referencing**: if an article (already notified by a supplier) is incorporated into a complex object, the duty holder can refer to the submitted data without re-entering it

## Extension of the SSN (1)

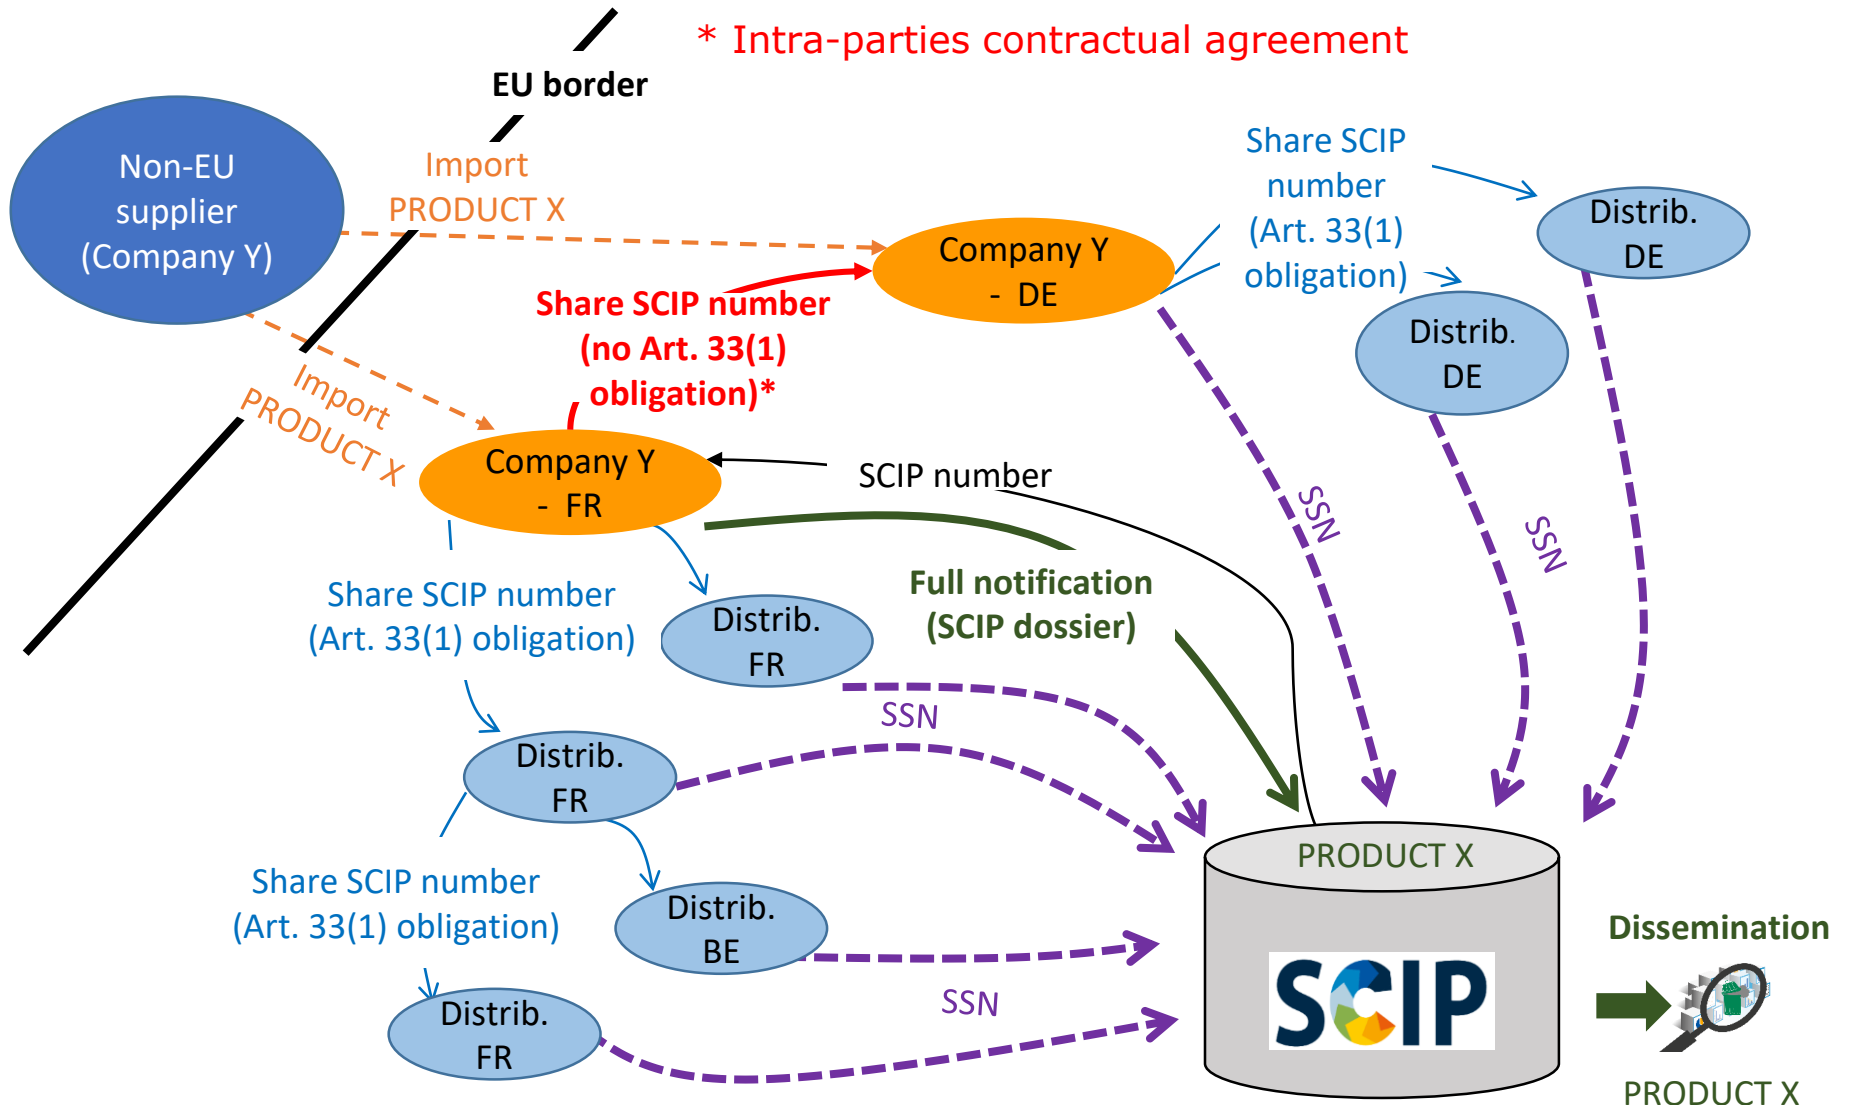

- SSN has been primarily developed to be used on a voluntary basis within the same supply chain, namely by distributors

But it can be extended and used in the following situations by companies at the top of 'parallel' EU supply chains, where there is no 'direct' commercial relationship:

- 'Sister' companies within a group
- Companies with exclusivity rights (exclusivity agreement) to place products from a brand in a specific MS market

**Condition:** intra-parties agreement, which must be kept available by companies to show compliance towards enforcement authorities in Member States

# Extension of the SSN (2)

For each SSN submission, a new SCIP number is issued
