This document lists the scheduled active substance product type (PT) combinations for which the evaluating Competent Authority (eCA) submitted the evaluation and passed the ECHA accordance check.

2. Planning for BPC and the WGs

In the tables below the scheduled Active Substance applications are listed for each process flow. The WG and BPC meeting are indicated, taken from the document “Timelines for the opinion-forming of Active Substance applications” (published on the ECHA web-site on the web-page of the BPC).

For each case the following is presented:

- Product type (PT);
- Evaluating Competent Authority (eCA);
- Submission differentiating between:
 - o CARs submitted for an active substance under the BPR;
 - o CARs submitted for a new active substance under the BPD;
 - o CARs submitted for an existing active substance under the BPD;
 - o CARs submitted under the Review Programme before the entry into operation (EiO) of 1 September 2013 of the BPR;
 - o CARs submitted under the Review Programme after the entry into operation (EiO) of 1 September 2013 of the BPR;
- If the active substance meets the exclusion criteria according to the information in the CAR;
- If the active substance is a potential candidate for substitution according to the information in the CAR;
- If there is more than one applicant for an active substance PT combination: multiple dossier.
- Reference is made to the working procedure for active substance approval which describes the principles for submission of the evaluation by the eCA and the subsequent opinion forming process.
