

Non-exhaustive list of relevant numerical identifiers for the Candidate List entry “4-heptylphenol, branched and linear”¹”

¹The entry in the Candidate List of substances of very high concern (SVHC) for:

“4-heptylphenol, branched and linear [*substances with a linear and/or branched alkyl chain with a carbon number of 7 covalently bound predominantly in position 4 to phenol, covering also UVCB- and well-defined substances which include any of the individual isomers or a combination thereof*]”

is a group entry for which numerical identifiers have not been specified.

The given entry, 4-heptylphenol, branched and linear [*substances with a linear and/or branched alkyl chain with a carbon number of 7 covalently bound predominantly in position 4 to phenol, covering also UVCB- and well-defined substances which include any of the individual isomers or a combination thereof*] covers the group of *p*-heptylphenols with linear or branched alkyl chain. These substances may include, in addition to mono-, para- substituted isomers also mono- and multi-substituted isomers in ortho, meta and para position at lesser concentration levels.

To facilitate the identification of substances that fall within the scope of this entry, a non-exhaustive list of numerical identifiers is provided in this note.

Disclaimer:

This inventory does not constitute a comprehensive record of all relevant numerical identifiers available. Please note that a substance identified by a numerical identifier other than those specified in this note may still be covered by this Candidate List entry. Similarly, a substance for which no numerical identifier is available may also be covered by this Candidate List entry.

There may be generic EC and CAS numbers covering at the same time substances within the scope of the Candidate List entry and substances which are outside the scope of this entry. Such other numerical identifiers are not listed in this note.
