

Section A 7.1.4 Annex Point IIIA XII.2.2	Further studies on adsorption and desorption in water/sediment systems and, where relevant, on the adsorption and desorption of metabolites and degradation products where the preliminary risk assessment indicates that it is necessary		
JUSTIFICATION FOR NON-SUBMISSION OF DATA			Official use only
Other existing data [X] Limited exposure []	Technically not feasible [] Other justification []	Scientifically unjustified [X]	
Detailed justification:	An adsorption/desorption (screening) study with sediment according to OECD test method 106 (Section A 7.1.3) is available. Sufficient data on the degradation of the a.i. is available, further studies are not deemed to be necessary. The risk assessment does not indicate that a further study is necessary.		
Undertaking of intended data submission []	Not applicable.		
Evaluation by Competent Authorities			
EVALUATION BY RAPPORTEUR MEMBER STATE			
Date	25 Nov 2009		
Evaluation of applicant's justification	Acceptable		
Conclusion	Sufficient data on the adsorption and desorption of the test substance has been submitted and therefore no further data are required.		
Remarks	The justification presented has been reviewed.
